CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENTS 11

11. Change Hardware compatibility of a VM (Either by clone/create new one) which is already created and configured, using virtual box.

Aim:

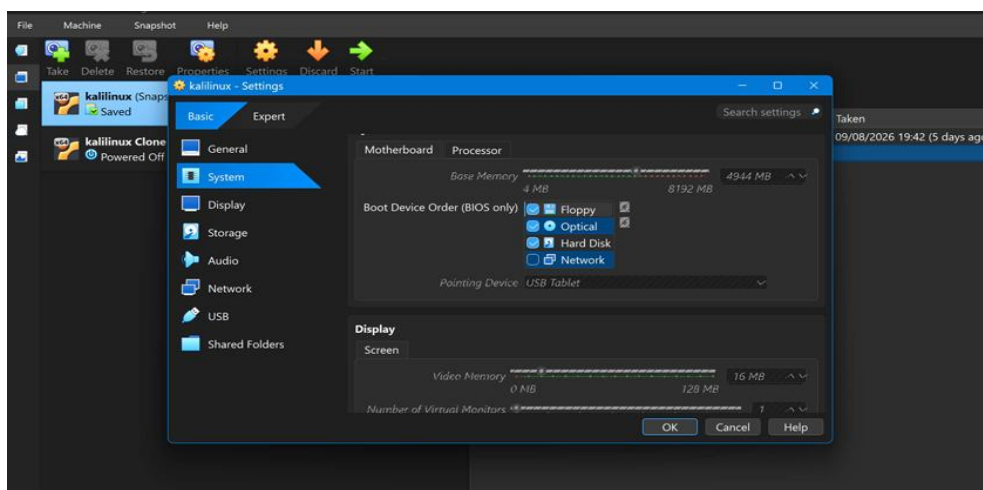

To change the hardware configuration/compatibility of an already created and configured VM using VirtualBox.

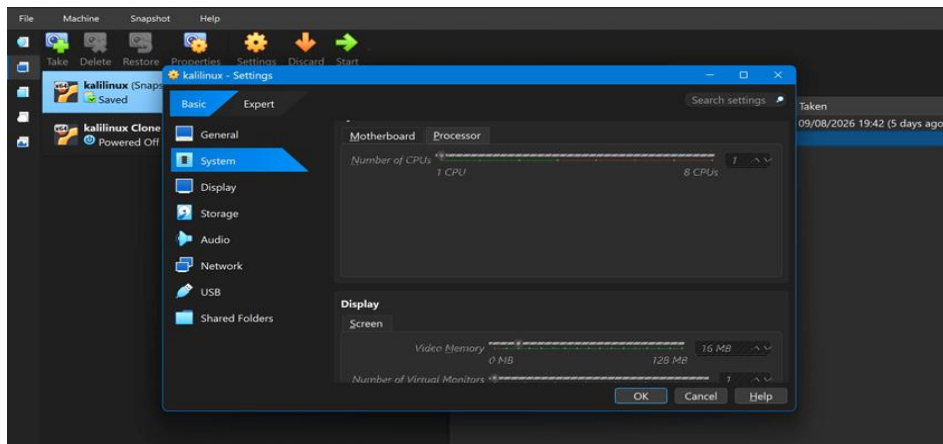

Procedure:

1. Open VirtualBox and select the existing VM.
2. Right-click the VM and select Settings.
3. Go to System and modify hardware settings such as CPU, RAM, and chipset.
4. Go to Storage and modify the virtual disk/controller if required.
5. Check Network settings and change the adapter type if needed.
6. Click OK to save the changes.
7. Start the VM and verify that it works correctly.

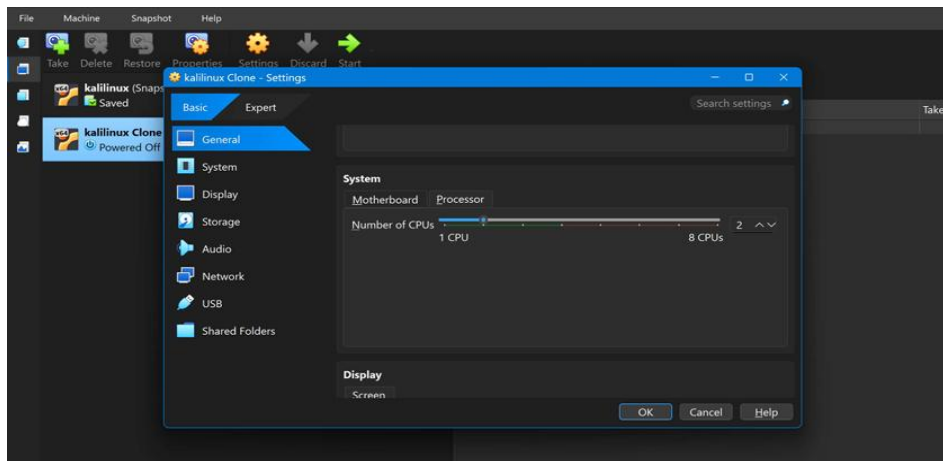

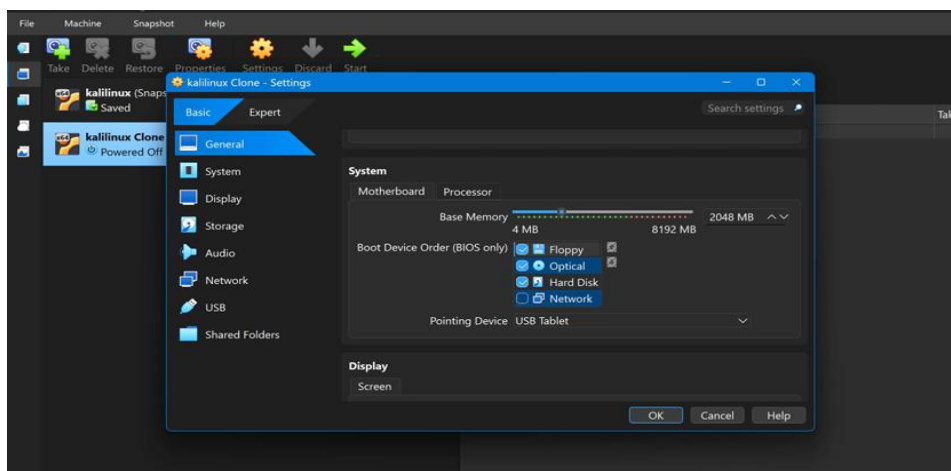

Snapchat:

Original VM:

Cloned VM:

Result:

Thus, the hardware configuration of the existing VM was successfully modified, and the VM was tested successfully using VirtualBox.
