CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENTS 12

12. Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux), using VMware workstation.

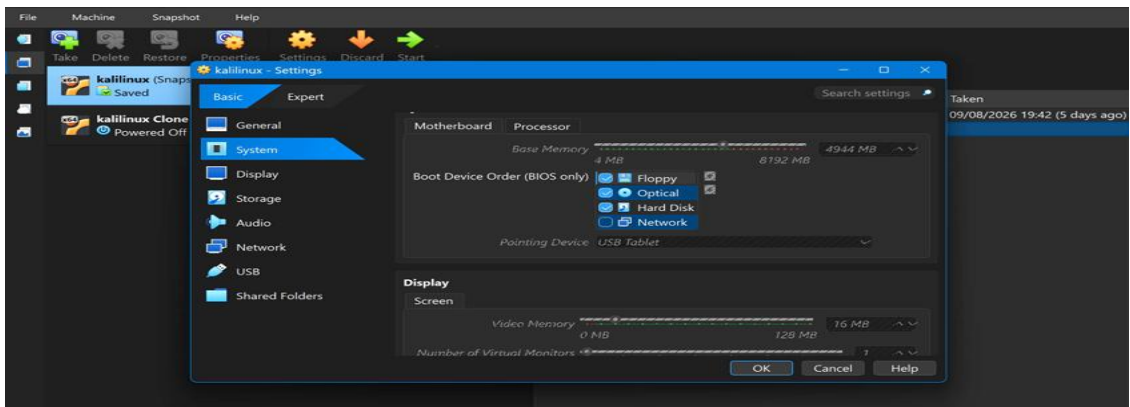

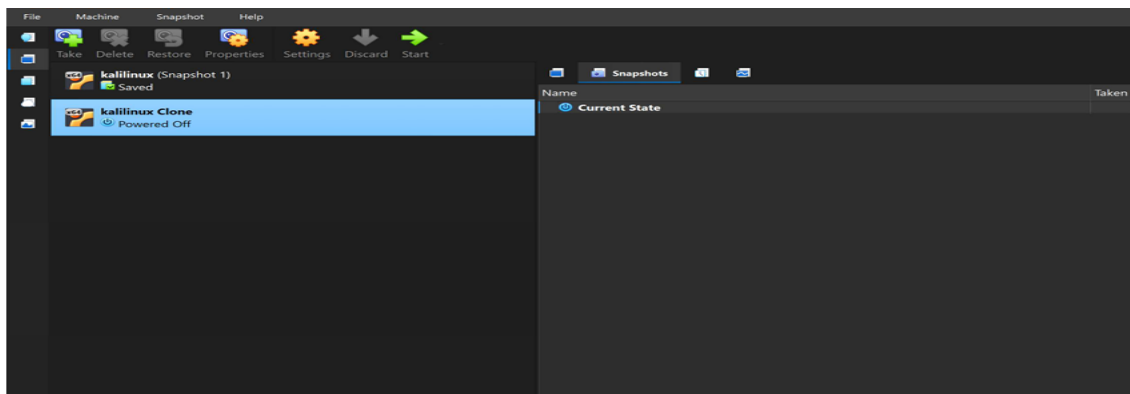

Aim:

To install a Type-2 Hypervisor (VMware Workstation) and create and configure a virtual machine with Windows/Linux OS.

Procedure:

1. Download and install VMware Workstation.
2. Open VMware Workstation and select Create a New Virtual Machine.
3. Select the required Windows/Linux ISO image.
4. Allocate RAM, CPU, and storage to the VM.
5. Configure the VM settings and click Finish.
6. Start the VM and install the operating system.
7. Verify that the guest OS runs successfully.

Snapchat:

Result:

Thus, VMware Workstation was successfully installed, and a virtual machine was created, configured, and executed with the selected operating system.
