CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENT 16

16. Create and Configure a New VM Image in a Public Cloud.

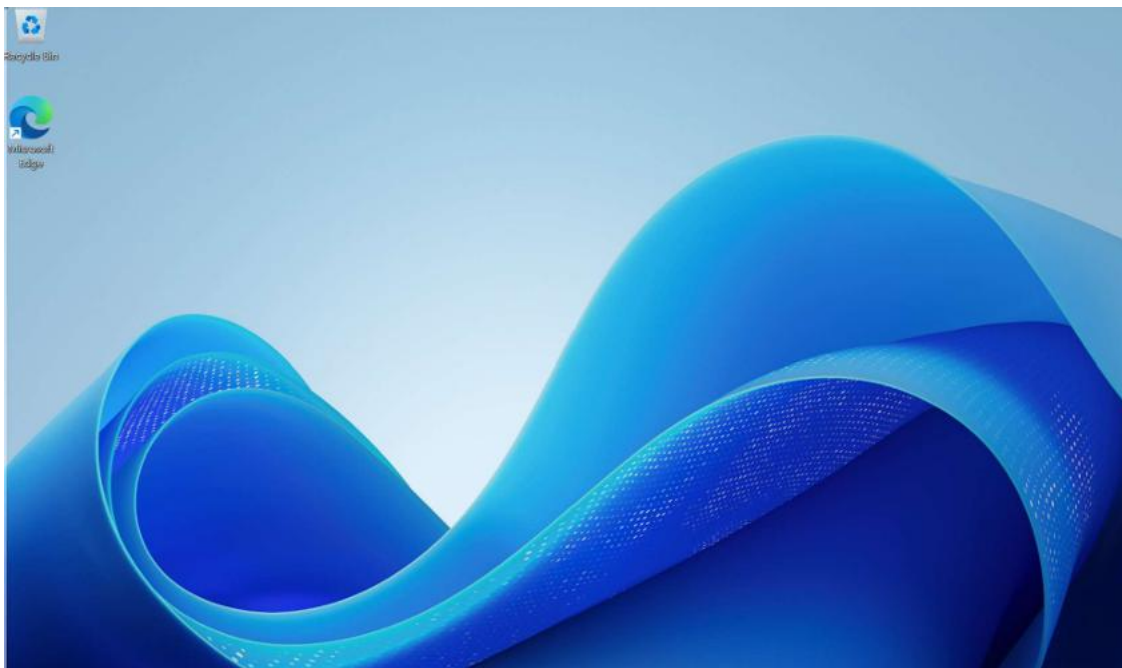

Aim

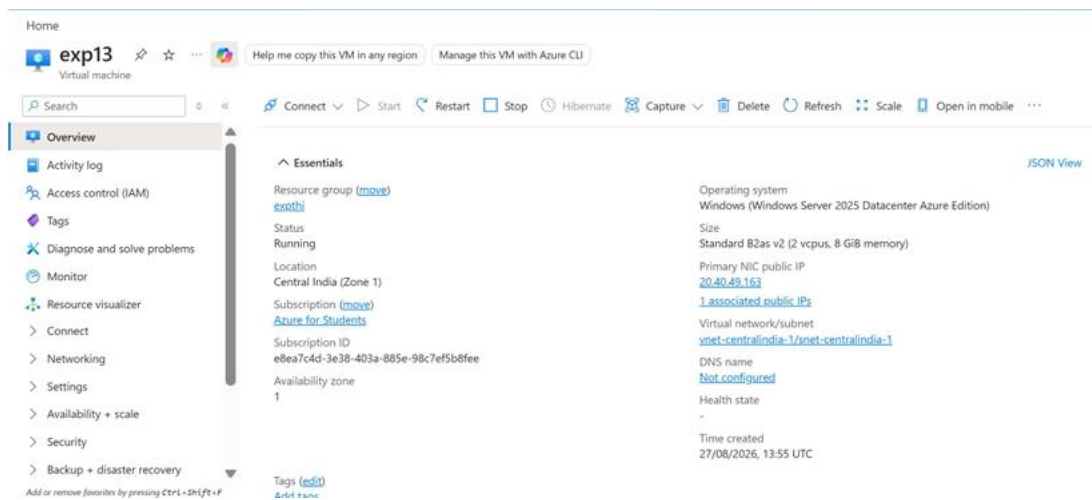

To create and configure a new Virtual Machine (VM) image using a public cloud platform.

Procedure

1. Login to the Microsoft Azure Portal.
2. Create a new Virtual Machine.
3. Select the required OS image, such as Ubuntu/Windows.
4. Configure VM size, username, authentication and networking.
5. Review and create the VM.
6. After deployment, configure the required software and settings.
7. Create and save a VM Image from the configured VM.

Snapchat:

Result:

A new VM was successfully created, configured and saved as a VM Image in the public cloud.
