CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENT 19

19. Create a Storage service using any Public Cloud Service Provider (Azure/GCP/AWS) and check the public accessibility of the stored file to demonstrate Storage as a Service.

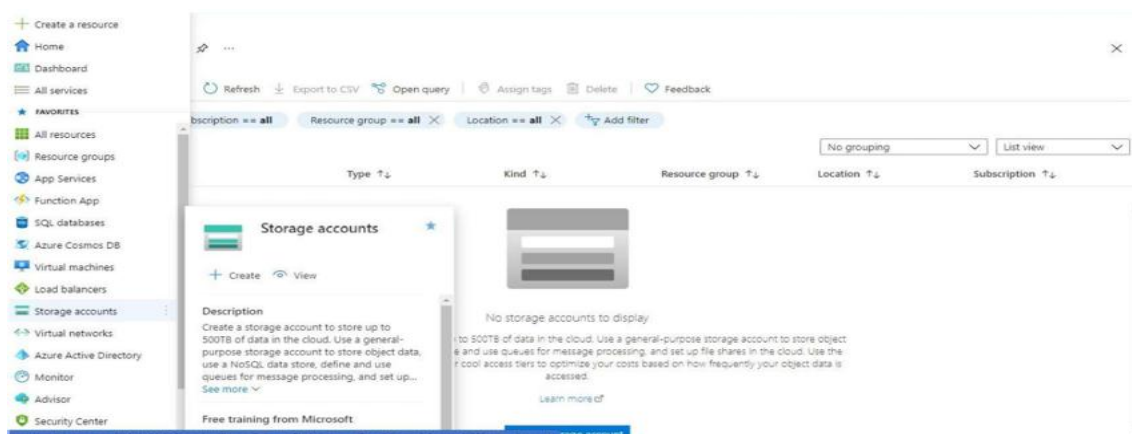

Aim

To create a cloud storage service using Microsoft Azure and check the public accessibility of a stored file to demonstrate Storage as a Service (SaaS).

Procedure

1. Login to Azure Portal.
2. Create a Storage Account.
3. Create a Blob Container.
4. Upload a sample file to the container.
5. Enable public access for the file/container.
6. Copy the file's public URL.
7. Open the URL in a browser and verify the file is accessible.

Snapchat:

Result:

The file was successfully uploaded to Azure Blob Storage and accessed through its public URL, demonstrating Storage as a Service (SaaS).
