

SAVEETHA SCHOOL OF ENGINEERING
CSA 15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENT 26

26. Create a simple cloud software application for Hospital management system for SIMATS library using any Cloud Service Provider to demonstrate SaaS.

Aim:

To develop a simple Hospital Management System as a cloud-based application using a Cloud Service Provider and demonstrate Software as a Service (SaaS).

Procedure:

1. Create a simple Hospital Management application.
2. Add modules such as Patient, Doctor, Appointment, and Records.
3. Deploy the application on a Cloud Service Provider.
4. Configure the application and database.
5. Access the application through a web browser.
6. Test the basic hospital management functions.

Snapchat:

The screenshot displays a web application titled "Hospital Management System". The interface includes a dark sidebar menu on the left with options: Dashboard, Appointments (expanded), + Appointment (highlighted in red), All Appointments, Statuses, Medical Records, Patient Profiles, Staff Directory, and Billing Invoices. The main content area is titled "Appointment" and contains a form with the following fields: Appointment Code (text input), Appointment Date (text input with placeholder "dd-MMM-yyyy"), Appointment Time (text input with placeholder "HH:mm:ss"), Reason (text area), Status (dropdown menu with "-Select-" selected), Patient (dropdown menu with "-Select-" selected), Doctor (dropdown menu with "-Select-" selected), and Notes (text input). At the bottom of the form are "Submit" and "Reset" buttons. The top of the application shows a trial expiration notice: "Trial expires in 11 days Upgrade Edit this application Help".
