LIST OF EXPERIMENTS 6

6. Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux) using virtual box.

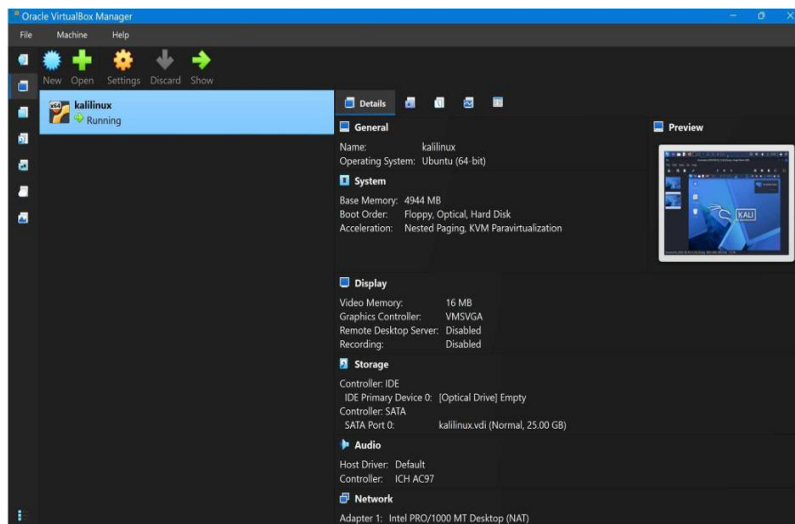

Aim:

To install a Type-2 hypervisor (Oracle VirtualBox) and create and configure a virtual machine with a Windows/Linux operating system.

Procedure:

1. Download and install **Oracle VirtualBox**.
2. Open VirtualBox and click **New**.
3. Enter the VM name and select the OS type/version.
4. Allocate **RAM, CPU, and virtual hard disk**.
5. Attach the OS **ISO image** to the VM.
6. Start the VM and install the operating system.
7. Configure basic settings such as network and storage.
8. Verify that the guest OS runs successfully.

Snapchat:

Result:

Thus, Oracle VirtualBox (Type-2 Hypervisor) was installed successfully, and a virtual machine was created, configured, and operated with the selected host/guest operating system.
